The Hiring Manager

PBS Systems

Calgary, Alberta

Subject: Application for Data Analyst (Req ID: #1074)

Dear Hiring Manager,

I am writing to apply for the Data Analyst position (Req ID: #1074) at PBS Systems. With hands-on experience in data extraction, transformation, and validation using SQL and Python, I am confident in my ability to support data conversions and ensure data accuracy within your growing organization.

During my internship at MentorPower Software Company, I collected, cleaned, and analyzed large datasets using SQL and Python to improve data accuracy by 15%. I created automated reporting workflows in Excel and Power BI to reduce manual efforts and enhance decision-making. As a Data Analyst volunteer at Jain BizHub, I led ETL workflow automation and implemented data modeling techniques to improve reporting efficiency by 30%. These experiences have helped me strengthen my problem-solving and analytical skills, which align closely with PBS Systems' focus on data quality and client success.

I am particularly drawn to PBS Systems' commitment to innovation and customer partnership. I am confident that my technical skills in SQL, ETL, and data validation, along with my attention to detail and teamwork abilities, would allow me to make meaningful contributions to your data conversion team.

Thank you for considering my application. I look forward to the opportunity to contribute to PBS Systems and would welcome the chance to discuss how my experience aligns with your needs. I can be reached at (647)-472-2601 or via email at shahsmruti1001@gmail.com.

Sincerely,  
Smruti Shah

## Professional Summary

Detail-oriented Data Analyst skilled in SQL, ETL, and data validation with hands-on experience in data modeling and process automation. Adept at ensuring data accuracy, supporting conversions, and developing insights to improve operational performance.

## Skills

- Database Tools: MongoDB, SQL, PostgreSQL, MySQL
- Analyzing Tools: Python (Pandas, NumPy, Matplotlib - Basic, NLP - Basic), Excel (Power Query, VBA, Macros, VLOOKUP, Pivot)
- Visualization Tools: Power BI, Tableau
- Data & Process Modeling: ERD, UML, Data Flow Diagrams (DFD), Use Cases, User Stories
- ETL/Data Pipeline: Pandas, Oracle ODI, OLAP Cubes, Azure Databricks (Basic)
- ML/AI: Scikit-learn (Basic), OpenAI API, Lang Chain
- Version Control: Git, GitHub
- Cloud Platforms (Basic Knowledge): Azure, AWS, Google Cloud

## Education

Conestoga College

- Reporting System and Database Development (May 2024 – Dec 2024)
- Software Quality Assurance and Test Engineering (May 2023 – Dec 2023)

Indus University

- Bachelor of Computer Application (Jun 2019 – Aug 2022)

## Experience

Volunteer Data Analyst | Jain BizHub (Jan 2025 – Sept 2025)

- Developed AI-based business directory to connect local businesses with customers.
- Led data modeling and process diagram creation for Flask-based AI system.
- Automated ETL workflows, improving reporting efficiency by 30%.
- Produced analytical reports with Google Analytics to measure growth.

Volunteer Web Developer | Jain Community Services (Jan 2024 – Dec 2024)

- Designed and maintained responsive community website using HTML, CSS, JavaScript.
- Collaborated with stakeholders to gather requirements and document user stories.
- Built dashboard for event registration and volunteer tracking.
- Improved website speed by 25% and developed SOPs for scalability.

Data Analyst Intern | MentorPower Software Company (Jun 2020 – May 2021)

- Collected, cleaned, and analyzed datasets using SQL and Python, improving accuracy by 15%.
- Maintained Power BI dashboards tracking KPIs for management.
- Automated Excel-based reports using Python, improving efficiency.
- Supported analysts in interpreting KPIs and producing insights.
- Collaborated with business teams to define requirements and document workflows.

## Projects

### AI-Powered Business Directory | Feb 2025

- Led requirements gathering and development of a Flask-based AI system for business data classification.
- Designed front-end workflows in HTML, CSS, and JS, improving user engagement.
- Generated weekly growth reports using Google Analytics.

### Amazon Sales Analysis Using ETL, OLAP, and ODI | Nov 2024

- Designed ETL pipeline to transform Amazon sales data for revenue and vendor insights.
- Built OLAP cube enabling faster executive reporting.
- Automated workflows in Oracle ODI to improve efficiency.

### ETL Pipeline Development | Oct 2024

- Created SQL-based validation scenarios ensuring clean reporting datasets.
- Modeled data into star schema, reducing query time by 40%.

### ABC Company IT Dashboard Analysis | Oct 2024

- Defined KPIs for system uptime, threats, and incident response.
- Built Power BI dashboard with automated refresh cycles, improving decisions.

### Global Education Data Analysis | Sep 2024

- Cleaned and transformed datasets using Python and SQL.
- Built Tableau dashboards to visualize literacy and enrollment trends.

## Certificates

- ECBA Certification | IIBA (Expected Dec 2025)
- [Microsoft Azure Fundamentals](#) | Microsoft (Apr 2025)
- Data Analytics [Foundations](#), [Data Exploration](#), [Data-Driven Decisions](#) | Google (2024–2025)
- [Cypher Fundamentals](#) | Neo4j Graph Academy (Jul 2024)

## Additional Information

- Eligible to work in Canada (Open Work Permit – valid until July 24, 2028)
- Willing to relocate within Canada
